Others Blood Test @ \$35 each (by using the same amount of blood taken)

Liver (AFP) - Alpha-Fetoprotein is a protein to screen for liver cancer.	Pancreas (CA19.9) - This test screen for Pancreatic cancer. Pancreas produce enzymes to digest food, as well as insulin to regular blood sugar.
Stomach/ Colon (CEA) - Carcinoembryonic Antigen is a type of molecular protein, which can be found in many different cells in our body. A rise in CEA level indicates progression or recurrence of the cancer.	Nose & Throat (EBV) - Epstein-Barr Virus is a common virus, which can be linked to several rare cancers; Hodgkin Lymphoma, Nasopharyngeal carcinoma etc.
Prostate (PSA) - Male Only - Prostate-Specific Antigen is a protein produced by cells of the prostate gland and is to screen for prostate enlargement and disorders.	Germ Cell (Beta HCG) - Elevation of Beta Human Chorionic Gonadotropin level indicates abnormalities in Uterus (Female) or Testicular (Male).
Ovarian (CA125) - Female Only - CA125 is a protein found in women. Women with Ovarian Cancer have relatively high level of CA125 in their blood stream.	C-Reactive Protein (HSCRp) - High Sensitive C-Reactive Protein is to measure the level of inflammation in the body. This may lead to several heart-related conditions such as; Heart Attack, Stroke, Peripheral Arterial Disease.
Breast (CA15.3) - Female Only - CA 15.3 is used to monitor breast cancer.	Stomach Ulcer (Helicobacter Pylori) - Helicobacter Pylori is a bacterium in the stomach. This bacterium causes chronic inflammation which may lead to stomach ulcers & gastritis.
Testosterone - This is the principal male sex hormone that plays key roles such as enhanced libido, energy, immune function and protection against bone loss. Testosterone levels decline gradually with men.	

Other Tests

Pap Smear	Early Detection of abnormal cervical cells before they develop into cancer	\$35.00
Chest X-Ray	Is to evaluate the lungs, heart and surrounding anatomy for abnormalities or infection	\$35.00
ECG	Detection of heart diseases, abnormalities of cardiac rhythm and heart enlargement	\$30.00
Eye Screening (Tonometry, Visual Acuity, Near & Color Vision)	<p>These test to check:</p> <ul style="list-style-type: none"> • if you're at risk for glaucoma, • checks how well you see the details of a letter or symbol from a specific distance. • checks how well you see the details of a letter or symbol from a specific distance. • if you have a color vision deficiency. 	\$35.00
Stress Treadmill	This is the gold standard in detecting silent ischaemic heart disease by assessing electrical activity of the heart under stress. Each result is reviewed by our panel cardiologist	\$200.00
Mammogram	Early detection of breast lumps- to look for any calcification; recommended for women above 40	\$130.00
Ultrasound Breast	Early detection of specific breast lumps -solid mass versus cyst; recommended for women below 40	\$120.00
Ultrasound Full Abdomen	Ultrasound visualisation of intra-abdominal organs such as liver, gall bladder, pancreas, spleen and kidney allowing early detection of nodules, cyst, stones, fatty Liver and diseases.	\$188.00
Ultrasound Pelvis	This scan enables visualisation of the women reproductive organs, to exclude ovarian tumours, cyst and uterine fibroids	\$145.00
Ultrasound Liver	A liver ultrasound can diagnose fatty liver disease and liver congestion or enlargement.	\$120.00
Ultrasound Thyroid	A thyroid ultrasound is usually done when you have a growth on your thyroid gland. The exam can help tell the difference between a sac containing fluid (cyst) and abnormal tissue that may or may not be cancerous (a tumor).	\$130.00
Ultrasound Kidney	A kidney ultrasound is a non-invasive diagnostic exam that produces images, which are used to assess the size, shape, and location of the kidneys. Ultrasound may also be used to assess blood flow to the kidneys.	\$120.00
Ultrasound Prostate	Prostate ultrasound, also called transrectal ultrasound, provides images of a man's prostate gland and surrounding tissue.	\$130.00
